## Van Ness Campus

CPMC's Van Ness Campus  
offers remarkable care,  
remarkably close.

### About Van Ness Campus

CPMC's new Van Ness Campus is a regional care center that integrates the latest medical technologies, advanced seismic safety and world-class healthcare.

The Van Ness and Geary Campus will be the hub for consolidated inpatient facilities and outpatient services. The planned development will eventually knit together hospital and emergency services, affiliated medical offices and specialty outpatient services, and parking in a tight urban setting.

### Specialty Services

CPMC's Van Ness Campus is a not-for-profit medical center that provides comprehensive general medical care to all, regardless of income. The campus also features several areas of specialty care:

#### Organ Transplant Services

Our dedicated transplant team performed the first six-way kidney paired exchange between six donors and six recipients in California. The center has better-than-expected patient outcomes for liver transplants (2018), according to the Scientific Registry of Transplant Recipients. And we've been performing heart transplants for nearly 40 years.

#### Pediatric Emergency and Specialty Care

The emergency department is served by child life specialists and doctors board-certified in both pediatrics and emergency medicine. Pediatric specialty care is provided by San Francisco pediatricians working side-by-side with doctors from Stanford Children's Health in more than 25 specialty areas.

#### Maternity Care

The Women and Children's Center at the Van Ness Campus helps deliver more than 5,000 babies a year. Our birth center has received the Joint Commission Gold Seal of Approval (2016-present) and was voted one of the Best Birth Centers by Bay Area Parent Magazine. We offer natural childbirth coaching, professional lactation consultants and a Level III NICU for newborns who need medical care.

#### Complex Gastroenterology

Doctors at the Van Ness Campus offer advanced imaging technology and minimally invasive procedures for disorders of the esophagus, stomach, gallbladder, pancreas, small intestine and colon.

#### Cardiovascular Care

The Van Ness Campus is home to CPMC's outstanding Heart & Vascular Center, which has received the Platinum Performance Award for heart attack care, and is recognized as a high performer in heart bypass surgery by U.S. News & World Report. Heart doctors at the center are experienced leaders in minimally invasive aortic valve surgery such as TAVR and TMVR.
